

I am a subscriber of XM Radio and enjoy listening to the traffic and weather channels. In addition, XM provides a variety of music and other content that is simply not provided in any other format. I do not understand why this content is even under discussion. Limiting the content of XM radio seems to fly in the face of some of the very principles upon which this country was founded.

I respectfully urge the FCC to reject NAB's petition 04-160 and support XM Radio's ability to provide the quality programming that we deserve.

Thank you,
